

14 GTO ARROWFLYTE
15 GTO ARROWFLASH

 **fletcher**

A firm favourite with water skiers and those who enjoy performance boating. There's plenty of storage space including a stern and ski locker and centre bow storage box.

15 GTO shown in Pearl and Claret and optional bow rails

15 GTO ARROWFLASH

Superb handling and thrilling performance from this versatile pocket rocket!

With room to accommodate four adults comfortably the Arrowflash is a top performer. Having a full fibreglass insert, the boat is practical and easy to keep clean.

This boat will easily do 45mph and is great for either skiing or for general pleasure.

One of its key attributes is its size. Easily towable behind a small family saloon and able to be launched and recovered with a couple of people, the 15 offers truly flexible boating - when you have finished, it can be stored in a single garage!

Storage behind the rear seat is large enough to hold two 25ltr fuel tanks and sundry gear whilst the generous side pockets

offer additional room for jackets, bags etc. The in-floor ski locker houses the – well ski's, and an additional bow storage box can be used for anything else you might need.

Its compact size belies its performance capabilities. This is a boat that came top in a magazine test for looks and handling against more powerful, larger craft.

It sports the trademark Fletcher deep V hull – a full 24 degrees – and full length aggressive strakes. It will take choppy water in its stride so if you do get caught out you know you have a boat that will get you home safely.

With boarding ladder, ski pole, tonneau and engine instrumentation included as standard there is nothing stopping you getting straight on the water.

Ski pole fitted as standard

Boarding ladder

Centre bow storage box

Custom carbon dash

14 GTO ARROWFLYTE

To many, the 14 was 'their first Fletcher' and in the early 1970's over 20 a week were produced! There is still no better introduction to boating and the 14 definitely punches above its weight in the performance department.

With a 60hp ETEC this boat will reach 50mph so there is no problem pulling a skier or towing a ringo.

Incredibly easy to launch this boat can be towed behind a small saloon and stored in a single garage with room to spare.

Available in a wide variety of colours this boat represents excellent value for money as it is cheaper than many jet ski packages and arguably more practical and just as much fun.
