

THE FLETCHER DIFFERENCE

All Fletchers are hand laid as we feel this produces a better boat and enables us to take advantage of the available fibreglass technology. Mass produced boats are commonly spray layed relying on building up a bulk of chopped strand mat to provide hull strength.

At Fletcher we hand apply two gel coats and then back this up with a layer of light matt. This is then left to cure before the rest of the lay up continues. The reason for this is that GRP relies on an exothermic curing process ie: a chemical change accompanied by the liberation of heat. If too many layers are laid in one go the excessive heat build up during the curing process means you can get 'shrink back'. This is where the layers of mat are actually pulled back into the gel and in some cases you can see the strands through

the finished gel coat. Not very nice. That's why we do it differently.

We then utilise a variety of mats from multi-directional chopped strand mat to bi-directional woven silks to complete the lay up process. Woven silks are used to provide strength in key areas that are subject to higher stress such as the keel and chines of the boat. The lay up is further supplemented with core matt which adds bulk but little weight to the overall lay up. The end result is a mirror like finish and a hull that is lighter and stiffer than many of its rivals.

“It was beautiful when we went out but we got caught in a real blow - force 5/6. Only a Fletcher could handle that!”

Nick, Devon

A GREAT BRITISH PASSION

FLETCHER ARROWHAWK 19GTO LTD EDITION

Engine: Mercury 150hp Verado

Standard Features:

Smart Craft Multi Function instrumentation • Custom Black Gel Panel • Custom Fletcher Graphics • Limited Edition Interior Upholstery • Sport Steering Wheel • Height Adjustable steering column • LED navigation lights • Stainless steel bow rails and cleats • Rear Storage lockers • CD Stereo behind splash cover • Swivel passenger seat • Boarding ladder • Ski Pole • Bow and cockpit colour matched tonneau covers • Bilge pump • Horn • Fire extinguisher • Lockable glove box • SBS R2/1500B trailer

Options:

Hard Bow lid • Upgrade stereo to MP3 compatible • Cockpit carpet • Swivel helm seat • Electro Hydraulic steering • Multi roller trailer upgrade • Overall storage cover • Bimini Cover • VHF Radio • Depth sounder and other electronics • Wakeboard Tower

Boat Specification:

Length: 5.6m, on trailer inc engine 7.0m
Beam: 2.17m, on trailer 2.2m
Hull deadrise: 24°
Approx weight with engine: 1050kgs
Fuel tank capacity: 81ltrs

Fletcher

The marriage of this boat and engine produces the ultimate all round sportsboat package, with power to easily pull two mono skiers and room on board for family, friends and all their kit.

“Simply the best ski package I have experienced in over 20 years.”

Mark, Birmingham

Model shown comes with optional hard bow lid.

Enter Mercury and the mighty 150hp Verado. This super charged beauty has redefined outboard performance since its launch delivering rocket fast hole-shot, powerful mid range punch and blazing top speed.

ARROWHAWK 19GTO

Fletcher Boats have a long and successful history producing class leading ski and performance boats holding many accolades in both disciplines.

In an overcrowded market with little to differentiate models or excite potential purchasers we thought we would try and offer something special. With its aggressive hull design, full length strakes and 24 degree deep V hull there are few boats to match the performance and handling of the 19GTO Limited Edition.

We knew we had the boat but wanted to produce a package that would satisfy the competent skier and also serve the needs of practical boating whilst not forsaking that

LIMITED EDITION

elusive thrill factor - so we needed something special in the engine department.

Enter Mercury and the mighty 150hp Verado. This super charged beauty has redefined outboard performance since its launch delivering rocket fast hole-shot, powerful mid range punch and blazing top speed. The Verado's unique supercharged and intercooled design produces dramatically higher torque and mind blowing acceleration. Comparably sized 'traditional' engines don't even get a look in.

Yet all this power is not delivered at the expense of your eardrums. Thanks to an insulated and isolated cowl, an idle-relief silencer and other sound-deadening technology, the Verado is whisper quiet as well as screaming fast.

Having undergone over 25,000 hours of testing this is one of the most comprehensively proven marine power units ever produced and Mercury are not afraid to back this claim offering their exclusive three-year limited factory warranty and boasting the industries only three year limited warranty against corrosion failure.

Just so you know how well you are performing the Verado comes with 'Smart Craft' instruments. These multi function beauties combine a digital and analogue dial to give you all the information you could ever need.

There is one boat suitable to harness this power and that is the fantastic Fletcher 19GTO. The marriage of this boat and engine produces the ultimate all round sportsboat package, with power to easily pull two mono skiers and room on board for family, friends and all their kit. Control of the boat is via a deluxe large diameter cushioned steering wheel with

height adjustment. Hydraulic steering is standard but for those who want finger tip control optional electro-hydraulic power steering is available. The throttle control lever is super precise. Set the lever and it stays there - no constant juggling of the control to maintain a steady speed.

To further complement this package we have included a matching black gel panel with red pinstripe, custom Fletcher graphics and matching interior. From the generous stainless steel rails and fittings to the exclusive LED navigation lights everything about this package shouts quality and performance.

To truly understand the Fletcher difference and what makes this package so special why not contact the sales office and ask for details of demonstration days - they will be more than happy to help.
